

South Shore Women's Health Care
Self-Pay Policy
Effective May 24, 2023

POLICY

We strive to provide quality OB/GYN services regardless of whether or not the patient has insurance coverage, and are committed to offering a discount to patients that do not use insurance to pay for their services. This discount applies to all services provided by our office, and applies when patients are paying promptly on the date of service.

PROCEDURE

At check-in, employees will determine if there is insurance coverage for the appointment. If the patient does not have coverage or elects not to use their coverage, they qualify for a 20% discount on every service we offer. This discount is applied at check-out when the patient pays on the date of service (with the exception of the delivery package, which is paid in installments and still qualifies for the discount). If the patient cannot pay in full for their appointment on the date they were seen, no discount is provided, and they will be billed the full amount on their next statement.
